adjustable interchangeables

We designed three mantel shelves (Concorde, Stanford and Wedgewood) that can be combined with three different surrounds (Ivy Green, Mountain Brook and Salem) to create nine mantel styles. The surrounds are adjustable in width and height. For wood types and finish options, see back cover. Shelves not adjustable.

Mantel Measurements

	Leg Width	Leg & Shelf Overhang	Breast Height
Heritage	10 1/2	14 7/8	16 3/4
Beaumont	11 3/4	16	16 3/4
Cambridge	9 1/2	14 1/8	16 3/4
Andover	6	9 15/16	15 1/4

The Opening Width C, Opening Height B and Return Depth G (cavity behind mantel) will be made to your specifications

Opening Width C = Your facing width minus 1 inch
Opening Height B = Your facing height minus 1/2 inch
Return Depth G = Your facing thickness plus 1/4 inch

For other dimensions use the following formulas:
(A=Z+B, E=C+2X, D=C+2Y)

Shelf Measurements

	Shelf Depth	Shelf Height	Lookout Depth
	F	H	LD
Hartford	10 1/4	14 3/4	6 3/4

The Length (D) will be made to your specifications.

Custom sizes available in all styles.

contemporary collection

The designs in the Contemporary Collection were inspired by the preferences of American designers. The styles are meant to be simple, with an emphasis on straight lines rather than the more traditional dentil moulds, heavy crowns and flutes. The Contemporary Collection will add style to any room setting, whether found in a Chicago loft, New York condo or a cozy country cottage. All of the designs are built to your specified opening dimensions and in a variety of wood types and finishes.

Cherry with Cherry Finish

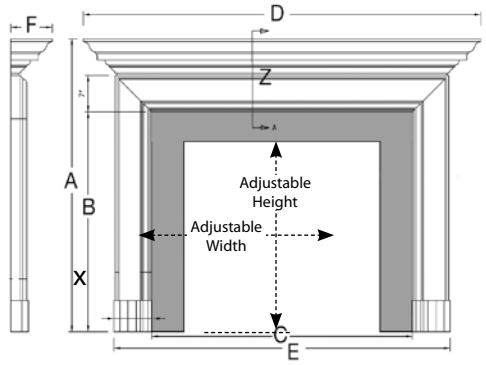
Allow for 2" arch when ordering. Opening height is to top of leg, not arch.

Custom sizes available in all styles.

premier thin cast stone series



Thin Cast Stone is a fiberglass reinforced gypsum product. Premier's Thin Cast Stone mantels are durable yet lightweight, easy to install and non-combustible. Each mantel kit includes matching facing panels and hearth. The facing panels adjust to fit a variety of firebox openings. Custom sizing is not available for Thin Cast Stone designs.

Traditional Cream Finish

Traditional Cream Finish

Shown in Cedar Brown Finish Color

Wellington includes surround, shelf and hearth.

Castle Surround includes surround and hearth, no shelf.

Shown in Cedar Brown Finish Color
Hollow Beam Cast Stone Shelf
60″ length x 5″ height x 7.75″ depth

**** Mix and matching of Cast Stone header and legs is allowed. Kington header w/ Edinborough legs is shown here. Simply state your desired combination when ordering: Kington header w/Edinborough legs; Edinborough header w/ Abington or Kington legs.

6″ tall x 66″ long x 6″ shelf depth

PLEASE NOTE: All thin cast stone units are shipped with traditional cream finish unless otherwise requested.

premier cabinet line

UNIQUELY DESIGNED CABINETS WITH ADJUSTABLE OPENINGS

The Premier Mantel Cabinet Line offers three unique designs in a variety of wood types and finish options. All three designs are available as cabinets or corners. Accessory options such as bookcase/ TV tops and raised hearths are available for each design. Side bookcase options are available for cabinets only.

The Premier Cabinet Line features openings that are adjustable in both width and height! The width is adjusted by simply sliding the fascia boards in and out behind the legs. Simple straight line cuts are needed to adjust the opening height. You simply match up the size range of your firebox with the proper Premier Cabinet model number.

For wood types and finish options, see back cover.

measuring guide

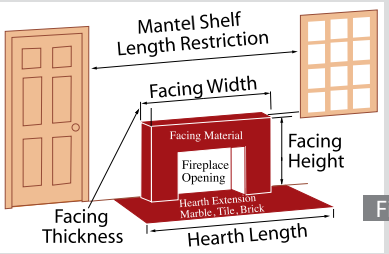

Fig. 1

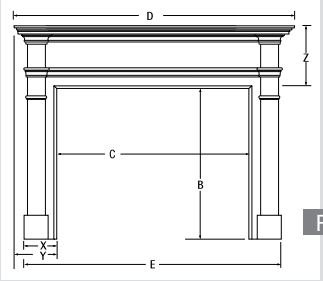

Fig. 2

PREMIER MANTELS & MILLWORK CO. MEASURING GUIDE

Ordering your wood Premier Mantel is easy when you follow the instructions below. You will need to provide three important mantel dimensions. The mantel Opening Width "C", mantel Opening Height "B", and mantel Return Depth (space behind mantel) "G".

Once you have determined these three dimensions, compare your needs to the stock sizes listed near each model within this catalog. NOTE: You can determine if a stock mantel opening will work by taking a few simple measurements. If your fireplace and facing material width and height measurements are determined to be no more than 6" wider and taller than the stock mantel opening width "C" and height "B", that stock sized mantel will fit your application. Just be sure that the stock size return depth "G" is at least 1/4" greater than the actual projection of your facing material out from the sheetrock wall.

CUSTOM MANTEL MEASURING

To insure the proper fit of your custom mantel use the following guidelines to measure your mantel:

DETERMINING THE MANTEL OPENING HEIGHT "B"

The Opening Height of the mantel of "B" dimension is determined by measuring the Height of the fireplace facing material and subtracting 1/2 inch from the Height to allow the mantel to overlap the facing material. See FIG. 1.

DETERMINING THE MANTEL OPENING WIDTH "C"

To determine the Opening Width of the mantel "C", measure the Width of the facing materials and subract one inch. This allows the mantel to overlap the facing material 1/2 on each side. You can overlap the facing material up to one inch less than the Width of the mantel leg if needed. See FIG. 1.

DETERMINING THE MANTEL RETURN DEPTH "G"

All fireplaces have a front or face made of non-combustible material such as brick, tile, marble or slate. This facing material may be installed flush with the wall of the fireplace or it may protrude in front of the fireplace wall. The distance the facing material sticks out in front of the wall is used to calculate the mantel Return Depth "G" measurement. See FIG. 1. Calculate the "G" measurement by adding 1/4 inch to the thickness of the facing material protrusion. Ex. If you are installing the mantel over 3/4 inch thick marble, you should specify a Return Depth "G" of 1" (marble thickness 3/4 inch + 1/4 inch = 1 inch). See FIG. 1.

READY TO ORDER

Once you determine your mantel Opening Height "B", mantel Opening Width "C", and mantel Return Depth "G" you can calculate all remaining mantel measurements using the standard dimensions found near each model within this catalog. This is important as you should always check to make sure that the overall length (Shelf Length "D") and outside leg to outside leg distance (Body Width "E") fit your situation. Important: Make sure your Shelf Length "D" allows you to install your mantel within windows and doors etc. Make sure your Body Width "E" is smaller than your hearth length so that your mantel legs do not hang off a raised hearth. See FIG. 1. Calculate these measurements by using the table below once you have determined your "C" dimension.

CALCULATING CUSTOM MANTEL DIMENSIONS

When you customize your mantel Opening, you also change the Overall Shelf Length "D", Body Width "E", and Overall Mantel Height "A". See FIG. 2. Use the following formulas to determine these sizes:

Overall Shelf Length "D"	D=2Y+C
Body Width "E"	E=2X+C
Overall Mantel Height "A"	A=B+Z

wood mantel and shelf finishes

Other stain/wood combinations are available, call us for details.
